

\$2.6M

the average cost of a data breach for a company in Australia¹

Is your organisation protected from opportunistic and automated cyber-attacks?

Cyber criminals are constantly trying to identify and exploit vulnerabilities in computer networks and applications. Ransomware is increasingly popular, with Australian businesses seen as easier targets.

Organisations can't possibly know about every emerging threat and vulnerability, yet systems and networks require constant monitoring to keep pace with new threats. Protecting your business from cyber-attacks makes good business sense:

- ✓ Comply with government legislation
- ✓ Avoid litigation
- ✓ Avoid regulatory fines
- ✓ Protect your organisation from financial and reputational damage

Are You Properly Protected?

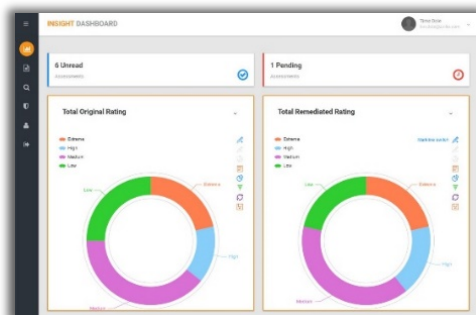

External Security Health Check Offer

Knowing how secure you are from malicious internet users is the first point of call. In partnership with cyber security provider ZIRILIO, LAUW policy holders can feel comfortable knowing they are checked monthly for vulnerabilities.
